

MODULAR SOLUTIONS

Through a collaboration of, fabrication and project management, PTW Energy Services seamlessly executes a wide variety of modular solutions. From single building self-frame enclosures to integrated rigid frame E-houses with multiple splits, our team can customize any project to achieve your unique specifications. We are dedicated to safety, quality and service from the concept through to the delivery of every building.

COMPREHENSIVE PROJECT SERVICES

- Structural, electrical and mechanical engineering services and/or design assistance upon request
- Procurement and materials management
- Integration of all required module components
- In-house HVAC application expertise
- Construction support
- Pre-assembly to final configuration prior to shipping
- Complete commissioning and testing
- Building re-instatement
- Field commissioning services
- Logistics management
- 24/7/365 maintenance offering

FEATURES

- Our building solutions are manufactured to comply with CSA certifications
- Secured 40 acre fabrication yard located in Calgary, Alberta
- Expansive climate controlled warehouses for large equipment handling/storage
- Vendor neutral integrator committed to highest quality standards

MODULAR SOLUTIONS

VALUE-ADDED BENEFITS

- We specialize in fast track schedules, simultaneously executing multiple projects and increasing project capacity.
- We engineer cost-effective solutions for countless constraints: shipping size and weight, extreme environments, code limitations, etc.
- One point of contact. Simple, effective and efficient.
- Our Project Managers have the hands on experience and communication expertise you'll want on your projects.
- Routine safety, quality and production reports are provided throughout the duration of our projects.

Industry Segments

- Agriculture
- Commercial
- Forestry
- LNG
- Mining
- Oil & Gas
- Oil Sands
- Utility Power Generation

Building Type

- Control Buildings
- Custom integrated solutions
- E-houses - low, medium and high voltage
- I/O buildings
- Lab buildings
- MCC/VFD buildings
- Multi-component power substations
- Office complexes
- Pump and process buildings
- Remote instrument buildings

Industry Segments

- Acoustic or non-acoustic
- Blast resistant
- Fire resistant and/or fire proofing
- Corrosive resistant
- Rigid-framed
- Self-framed
- Split or stackable
